### Important Note

Equity Linked Investments and Structured Notes are structured products involving derivatives. The investment decision is yours, but you should not invest in that investment product unless the intermediary who sells it to you has explained to you that the product is suitable for you having regard to your financial situation, investment experience and investment objectives.

### Risk Disclosure Statement for Equity Linked Investment Services

- The price or value of the Equity Linked Investments (ELIs) fluctuates, sometimes dramatically. The price or value of the ELIs may move up or down, and may even become valueless. It is as likely that losses will be incurred rather than profit made as a result of subscribing for, buying and selling the ELIs. Investors should therefore carefully consider whether such transactions are suitable in light of their financial position and investment objectives before entering into such transactions.
- Not principal protected: ELIs are not principal protected. You may suffer a loss if the prices of the underlying asset(s) of an ELI go against your view. In extreme cases, you could lose your entire investment.
- Limited potential gain: The potential return on your ELI may be capped at a predetermined level specified by the issuer.
- Credit risk of the issuer: When you purchase an ELI, you rely on the credit-worthiness of the issuer. In case of default or insolvency of the issuer, you will have to rely on your distributor to take action on your behalf to claim as an unsecured creditor of the issuer regardless of the performance of the reference asset(s).
- No collateral: ELIs are not secured on any assets or collateral.
- Limited market making: Issuers may provide limited market making arrangement for their ELIs. However, if you try to terminate an ELI before maturity under the market making arrangement provided by the issuer, you may receive an amount which is substantially less than your original investment amount.
- Investing in an ELI is not the same as investing in the reference asset(s): During the investment period, you have no rights in the reference asset(s). Changes in the market price of such reference asset(s) may not lead to a corresponding change in the market value and/or potential payout of the ELI.
- Conflicts of interest: Issuer of an ELI may also play different roles, such as the arranger, the market agent and the calculation agent of the ELI. Conflicts of interest may arise from the different roles played by the issuer, its subsidiaries and affiliates in connection with the ELI.

### Risk Disclosure Statement for Structured Notes

- Investment involves risks. The price of structured notes fluctuates, sometimes dramatically and the worst case may result in loss of your entire investment amount. There is an inherent risk that losses may be incurred rather than profits made as a result of trading structured notes.
- Investors should consider their own investment objectives, investment experience, financial situation and risk tolerance level.
- Investors should carefully read the relevant offering documents and the Terms & Conditions of relevant product/service before making any investment decision.
